

The old-fashion, handcrafted process at Torres strives for maximum quality and respect for our traditions. Our philosophy is based upon passion for the quality of our raw materials, in caring for and respecting the crops, and sustainable development that guarantees an artisan product with a unique personality in the gastronomy world.

We care for our product from the beginning with the selection of the best potatoes that come from our farmers with whom we have been working with for over 35 years. With the best raw materials, a careful

and meticulous elaboration process begins in which the know-how infuses each phase until a gourmet potato chip is obtained, creating an authentic delicacy.

We also devote our efforts to obtain select, high quality nuts with high nutritional values and health benefits; resulting in the best of the Mediterranean.

RAW MATERIALS

We are a company committed to our product range, therefore, the selection of excellent raw materials is our goal in order to develop and offer a natural product without additives or preservatives, giving them a flavor, aroma and texture unique to the market.

We take great pride in our handcrafted elaboration process starting with the selection of the highest quality ingredients for each of our product ranges: TORRES Artesanal, TORRES Selecta and Nuts.

Creating high quality products that are healthy and tasty is what we know how to do, and it's what we love to do. Our philosophy infuses all of our snacks.

Additional
